-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 6-9, 11-13 and 16 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 30, 2004.
2. Applicant's election with traverse of invention of group I in the reply filed on August 30, 2004 is acknowledged. The traversal is on the ground(s) that no serious burden exists on the examiner by examining claims 1-16 in a single application. This is not found persuasive because under MPEP 809 and 809.02 (a) there is no requirement to prove a serious burden is on the examiner to examine the inventions.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102/103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3728

5. Claims 1-5, 10 and 14-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hansen (5,076,474).

Hansen '474 discloses an eye drop container including a bottomed conical hollow formed in the tip end of the container body formed from a heat-sealable synthetic resin material with a liquid filled and sealed therein, the said hollow having an inside diameter enlarging toward the tip end, and a small-diameter instilling hole penetrated through a bottom of the said hollow for controlling, at a set quantity, the liquid pushed out of the container body. See Figures 1-2 embodiments.

Thermoplastic material is a heat-sealable synthetic resin material, furthermore, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

With respect to claims 3 and 10, note the threaded portion 4 in Figure 2 embodiment.

With respect to claims 4-5 and 14-15, and the size of the hollow, it would have been an obvious matter of design choice to modify the size of the hollow depending on the type of liquid used, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 220 F.2d 459, 105 USPQ 237 (CCPA 1955).

The –product-by-process limitation in claims 1 and 2 result in no structure that is different from Hansen '474.

Art Unit: 3728

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are eye drop containers analogous to applicant's instant invention.
